

APPENDIX D WATER RESOURCES

This appendix describes in detail water resources referenced in the text and tables presented in Sections 3.3 and 4.3.

Table of Contents

Supporting Tables

Table D-1	Water Quality Parameters In Mississippi Sound And Back Bay
Table D-2	Average Monthly Wastewater Flows - Wastewater Treatment Plants in Coastal Mississippi
Table D-3	Permitted Industrial Wastewater Discharges near the Broadwater and Alternative 3 Sites

Supporting Figures

None

Supporting Analyses

Section D.1	Source Loading and Management Model (SLAMM) Description
Section D.2	Summary of Federal and State Water Quality Initiatives
	D.2.1 National Pollutant Discharge Elimination System (NPDES) - Phase II
	D.2.2 Total Maximum Daily Load (TMDL)
	Table D.2-1 State TMDL Implementation Planning Cycle
	D.2.3 Best Management Practices (BMPs)
	Table D.2-2 Mississippi State and Local BMP Participation
	D.2.4 Comprehensive Resource Management Plan (CRMP)
Section D.3	Proposed Stormwater Best Management Practices
	Figure D.3-1 Alternative 2 – proposed stormwater BMPs for landside development
	Figure D.3-2 Alternative 2 – proposed stormwater BMPs for waterside development
	Figure D.3-3 Typical infiltration BMP drain field
	Figure D.3-4 Typical vortechs oil & grit separator
Section D.4	Water Quality Modeling and Description of Marina Circulation/Aeration System
	D.4.1 Mississippi Sound
	D.4.2 Marina Water Quality
Section D.5	Mississippi Department of Environmental Quality Water Quality Certification Guidelines - Freshwater and Coastal Marina Guidelines
Section D.6	Mississippi Department of Environmental Quality Water Quality Certification Guidelines - Stormwater Runoff Plan
Section D.7	EPA STORET Water Quality Data from Popp's Ferry and Clay Point Monitoring
